About faculty of **Dentistry**

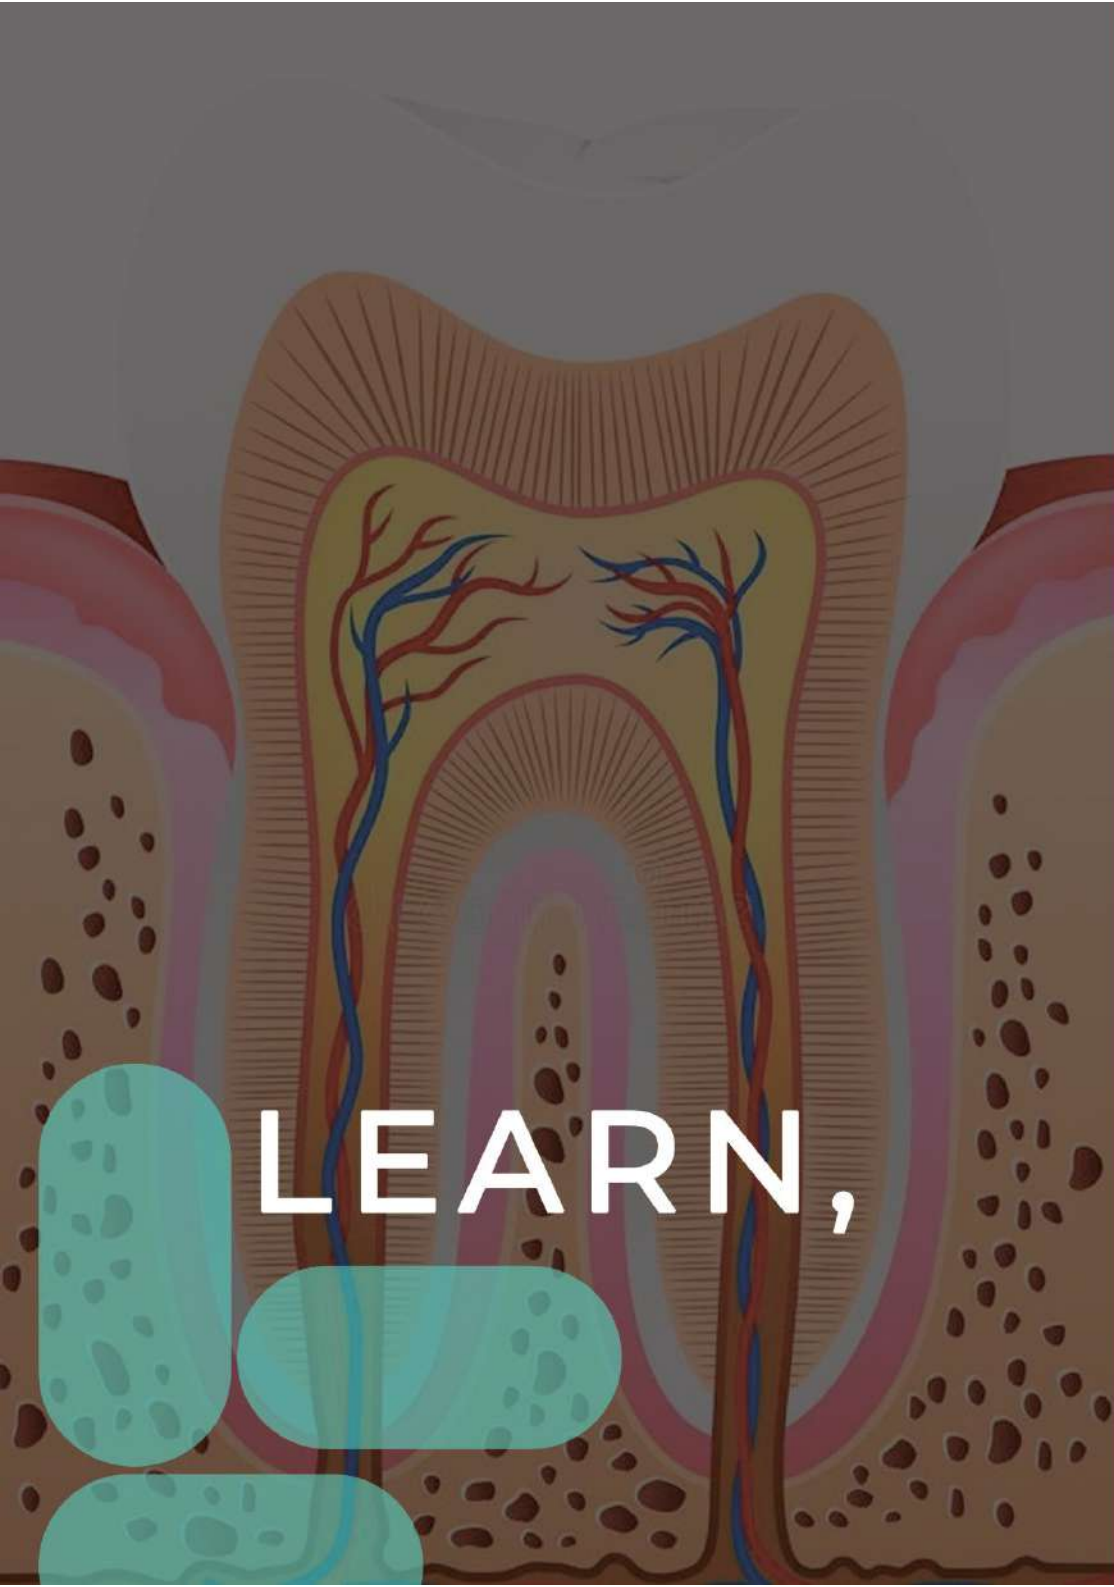

Faculty Overview

Innovation University established its Faculty of Dentistry in 2025 (Republican Decree No. 522/2025) to deliver educational and therapeutic services that prepare graduates able to meet contemporary challenges by fostering creativity and innovation; the faculty aims for national and international excellence through strengthened education, training, and research across dental specialties, upgraded infrastructure, technology, and academic resources, modernized assessment systems, expanded research aligned with Egypt Vision 2030, and widespread ICT use in education and care, while equipping students with innovative clinical skills, enhancing student support, engaging alumni, securing sustainable financial resources, advancing community service and sustainable development, and attracting and continuously developing distinguished faculty and staff proficient in modern teaching methods. Located in 10th of Ramadan City, one of Egypt's largest and most dynamic regions, the faculty benefits from strong connections to healthcare institutions serving a wide and diverse population.

Mission

The Faculty of Dentistry at Innovation University is committed to preparing graduates who are dentists in accordance with national academic reference standards. These graduates possess high scientific and professional competence, meet therapeutic needs to serve the community, demonstrate innovation and creativity in dentistry to compete in the job market, and can conduct scientific research within the framework of values and ethics.

Vision

The Faculty of Dentistry at Innovation University aspires to lead and excel in innovative education and learning in the sciences and arts of dentistry. It achieves this through continuous education that serves scientific research and meets the needs of local, regional, and international communities.

Why Study Dentistry at Innovation University?

Join Innovative University's BDS program for its forward-thinking design that prepares you for success in dentistry.

- ◆ **Market Relevance:** Aligned with Egypt Vision 2030 and national standards, our graduates meet high demand in Egypt's growing healthcare sector and compete regionally/internationally.
- ◆ **Practical and Experiential Learning:** Emphasizes hands-on clinical training across 10 semesters plus a mandatory one-year internship, ensuring real-world proficiency from day one
- ◆ **Updated and Industry-Aligned Curriculum:** 185 credit hours feature cutting-edge topics in basic sciences, clinical dentistry, and electives, delivered via hybrid modes with modern tech integration.
- ◆ **Career Readiness and Employability:** Builds innovative skills, ethical research capabilities, and professional competence, fostering creativity to excel in competitive job markets.
